## Preparing For The Summer

Most households take proactive steps to save energy whenever they can. When businesses and other commercial properties get involved in conserving energy as well, the positive results can be exponential. Colorado businesses should start thinking about ways to conserve energy as the weather gets warmer.

## Our Clients Are Saying:

## What Is A Commercial Energy Audit?

Commercial energy audits are performed in a staged manner. It starts by "benchmarking" your building to set a baseline and further track utility consumption over time. This saves energy and money over time!

"The energy audit probably saved my life! My auditor was a really nice guy who followed up multiple times after my audit to make sure that I had solved my health and safety issue." - Janice, Denver
