

### Reasons To Have a Carbon Monoxide Detector In Your Home or Apartment

Carbon Monoxide is often called a 'silent killer' because it is odorless, colorless and tasteless, so it is virtually impossible to know when you have a leak. Carbon Monoxide poisoning causes more than 400 deaths and 20,000 hospital visits in the U.S. each year. The only safe way to detect Carbon Monoxide in your home or apartment is with a working Carbon Monoxide Detector.
