

The Coal Export Wars Reach Oakland

Expanded west coast infrastructure to support the **export of western U.S. coal to Asian markets** has long been part of the business plans for some of the nation's largest coal producers. However, attempts by Powder River Basin coal interests to construct or expand coal export terminals in Washington and Oregon in recent years have been dealt fairly high profile setbacks by local officials under pressure from citizen activists.

Update From the Paris Climate Talks: New Commitments and Funding for Building Efficiency

More than 100 banks managing a total of \$4 trillion in assets called for a doubling of energy efficiency by 2030. While heads of state, environment ministers, and

climate negotiators labored to reach a global climate agreement in Paris, numerous side meetings focused on specific actions that will lead to lasting carbon reductions were in the spotlight.

Our Clients Are Saying:

"Steve came and did my assessment which was absolutely fabulous. I learned a lot! Thanks to all of you for providing such a wonderful service." Nancy, Aurora, CO

"Andy was comprehensive in his study of our energy use and our building, and thorough in their explanations of what we have achieved and what we can achieve in terms of efficiency and energy use." Rory, Lakewood, CO

About ASHRAE Commercial Energy Audits

The American Society of

Heating, Refrigerating, and Air-conditioning Engineers (ASHRAE)

offers three levels of energy audits that test the energy efficiency of a building. The Level 3 energy audit is comprehensive and extensive and generally takes many months to

complete. Most businesses' needs are met through conducting either a Level 1 or Level 2 audit. Following are the basics about ASHRAE Level 1 and ASHRAE Level 2 commercial energy audits to help you determine which one is best for your company

Results Of A Level 2 Audit

Properly Insulating Your Home

Winter is here! In Colorado, that means lots of snow and cold temperatures. Homeowners in this part of the country need to take precautions to make sure their homes are protected from the outdoor elements at this time of year. One of the best ways to protect a house from the harsh winter weather is by insulating it. Following are five reasons to properly insulate a home for winter in Colorado.

5 Reasons to Properly Insulate Your Home

Use Energy-Efficient Christmas Lights

If you leave a set of conventional Christmas tree lights on in your home for 10 hours a day over the 12 days of Christmas, you'll produce enough carbon dioxide - one of the main greenhouse gases - to inflate 64 party balloons. However, it's easy to save energy and still enjoy a wonderful light display.
