

WHAT IS AN ENERGY AUDIT?

A home energy audit is one of the first steps to understanding your home's energy usage, as well its overall health and performance. Using a high tech tests and evaluations, a good auditor provides homeowners with a list of energy and money saving steps, explains how and why your house is costing you money and prioritizes.

Andy has a NEW certification!

After a LOT of hard work, Andy Wildenberg is officially certified as a Multi-Family Building Analyst Professional! Way to go Andy! More info on [Building Performance Institute, Inc.](#)

BLOWER DOOR TESTING

Blower door testing is a way to test the "leakiness" of your home. By depressurizing your home and measuring the rate at which air infiltrates through imperfections in the building envelope, we're able to assess how much energy (and money) is escaping through air leaks.

DIY Project Gone Wrong!

An inventive homeowner used single part foam to prevent the central ac from cooling the basement. Unfortunately, no heat gets in the basement in the winter.
