

A Commercial Energy Audit Can Help Businesses Reduce Their Utility Consumption

The bottom line is always one of the most important considerations for a company. Most companies know and employ the obvious strategies for saving money to increase the overall financial success of a business.

However, there are some ways companies can save money that they do not realize. One such way is through an energy audit. **Commercial energy audits** can show companies where they have energy inefficiencies so they can be rectified, resulting in reduced utility consumption and lower utility bills.

Why this Could Finally be the Election Where Climate Change Matters

Now that the race appears to have narrowed to two, it sets up a situation that many environmentalists have long hoped for - one in which a sharp contrast on climate change between the two candidates means that it might not only come up prominently in an

election, but moreover, actually make a difference!
